Self-regulatory organization
based on membership of entities engaged in the preparation of project documentation

Association
a self-regulatory organization
"Community of engineering companies"
197110, St.Petersburg, Malaya Raznochinnaya str. 9 "A "

www.srospo.ru
Registration number in the State Register
CPO-П-172-25062012

St.Petersburg

6 April, 2016

CERTIFICATE

of permission to a particular type or types of work
that affect the security of capital construction objects

№ 0266.01-2016-7801136327-П-172

given out to a member of the self-regulatory organization:

NBE LLC

PSRN 1037800004615

VAT Reg. № 7801136327

198095 St.Petersburg, Marshal Govorov str., 35 "A", apt. 7 "H"

A basis for issuance of a certificate: Decision of the Council of Association SRO
"Community of engineering companies" Council, record № 20/16 dated 06 April, 2016

this Certificate confirms permission to the works listed in the Annex to this Certificate, which affect the security of
capital construction objects

start date from 06 April, 2016

The Certificate is not valid without an Annex.

The Certificate is issued for an indefinite term and the territory of his actions

Certificate is issued to replace previously issued _____

(date of issue, № of a Certificate)

President of Association's Council

L.L.Eryomina

Types of work, which affect the security:

1. of capital construction objects, including the especially dangerous and technically sophisticated objects of capital construction, nuclear facilities, and permission to which a member of the Association of Self-Regulatory Organization "Community of engineering companies" **NBE LLC has a Certificate**

№	Name of types of works
1	no

2. of especially dangerous and technically sophisticated objects of capital construction (except for nuclear facilities) and permission to which a member of the Association of Self-Regulatory Organization "Community of engineering companies" **NBE LLC has a Certificate**

№	Name of types of works
1	3. Formulation of construction solutions
2	4. Compilation of data on the internal engineering equipment, internal engineering networks and on the list of engineering and technical activities: 4.1 Project preparation for internal heating, ventilating, conditioning, smoke ventilation, heat supply and cooling utilities 4.2 Project preparation for internal utility water and sewage systems 4.3 Project preparation for internal electrical power supply systems 4.4 Project preparation for internal low current systems 4.5 Project preparation for internal dispatch control, automation and management of utilities 4.6 Project preparation for internal gas supply systems
3	5. Compilation of data on the external engineering networks and on the list of engineering and technical activities: 5.3 Project preparation for external electric power supply, for voltages up to 35 kV inclusive, and construction thereof 5.4 Project preparation for external electric power supply, for voltages not exceeding 100 kV inclusive, and construction thereof 5.5. Project preparation for external electric power supply, for voltages of 110 kV or higher, and construction thereof 5.7 Project preparation for external gas supply systems and construction thereof
4	6. Works associated with formulation of process design: 6.3 Formulation of process design for industrial buildings and facilities and complexes thereof 6.4 Formulation of process design for transportation facilities and complexes thereof 6.8 Formulation of process design for oil and gas facilities and complexes thereof 6.9 Formulation of process design for waste collection, management, storage, treatment and recycling facilities and complexes thereof 6.12 Formulation of process design for treatment facilities and complexes thereof

Annex to the Certificate
of permission to a particular type or types of work
that affect the security of capital construction objects
dated 06 April, 2016
№ 0266.01-2016-7801136327-П-172

5	7. Development of special sections of the design documentation: 7.2. Engineering measures for mitigation of natural and man-triggered emergencies 7.3. Elaboration of the statement on industrial safety of hazardous industrial facilities 7.4. Elaboration of the statement on safety of hydraulic engineering structures
6	8. Project preparation for organization of construction, demolition and dismantling of buildings and facilities, and service life extension and conservation of buildings and facilities
7.	9. Projecting environmental protection measures
8.	10. Projecting fire safety measures
9.	12. Inspection of the structures of buildings and facilities
10.	13. Arrangement of preparation of design engineering documentation by a legal entity or individual entrepreneur (general planner) contracted by the developer or client by virtue of an agreement

3. of capital construction objects (except extremely dangerous and technically sophisticated objects, nuclear facilities) and permission to which a member of the Association of Self-Regulatory Organization "Community of engineering companies" **NBE LLC has a Certificate**

№	Name of types of works
1	no

NBE LLC has a right to conclude contracts for fulfillment of organization of works on preparation of project documentation for capital construction objects, cost of which under one Contract does not exceed 5 000 000 (five million) of Russian rubles.
